

FREE: One Day Upgrade Workshop

Offer expires: 31st December 2008

DISCOVER WHAT'S POSSIBLE

 ACTUATE. INSIGHT DAY 2008
LONDON 11/11

Upgrading to Actuate 9/10 need not be difficult or time consuming. Allow Actuate Professional Services to visit you onsite for an upgrade workshop.

We can help you:

- Quantify the effort/time required to upgrade your application
- Reduce the risk in upgrading
- Accelerate your move to a supported platform

To help our existing customers migrate from the recently retired Actuate 8 to Actuate 9/10, Actuate Professional Services are offering a no cost one day upgrade workshop; all you pay is expenses.

Upgrading Actuate need not be difficult or time-consuming but it is different for every customer application. This programme is intended to help you quantify the effort involved and reduce the risk in upgrading with a view to accelerating your move to a supported platform.

DELIVERABLES

The main deliverable of this workshop is a recommendations document which includes:

- An outline upgrade plan
- An approach for testing
- A list of components that may need migration including portals, security modules and automated API processes
- An approach for updating report designs and identifying areas of special focus
